

Mission/Vision Statement

The Elliot Lake Community Liaison Committee (ELCLC) will strive to promote effective and clear communication of information between NWMO and the City Council and the residents of Elliot Lake and of our immediate neighbouring communities by participating in the **NWMO's Learn More Program** which concerns the potential siting in our community of a deep rock geological repository for Canada's used/spent nuclear fuel.

To serve the City of Elliot Lake as an advisory body, initiating, planning, implementing and evaluating matters pertaining to the NWMO's Adaptive Phased Management program (APM) within and near the municipality of Elliot Lake.
